AuditEQ Web Platform & Workflows

Detailed Functional Walkthrough, Visual Screen Blueprints, and Operational User Journeys for FundsIndia Surveillance Teams

01 What is the AuditEQ Web Platform?

Unified command center for equity voice surveillance and regulatory compliance

6 Views

Surveillance Modules

Audited Master, Scorecards, Trades, Calls, Reports, Manual Audit

1-Click

Scorecard Dispatch

Instant advisor email notifications with detailed breakdown

Multi-Export

Regulatory Formats

Official SEBI PDF, Excel Workbooks, and Word Documents

Enterprise Purpose & Target Audiences

AuditEQ is a web application built specifically for FundsIndia Equity Surveillance, Compliance Officers, and Dealing Desk Managers. It transforms thousands of daily telephone calls and trade executions into an interactive, audited compliance ledger.

Instead of manual sampling (where auditors manually listen to 1% to 5% of calls), AuditEQ audits 100% of calls automatically. The web interface empowers compliance teams to review speech evidence in real time, listen to synchronized audio snippets, verify dealer conduct, dispatch scorecards to advisors, and generate SEBI-ready inspection certificates with a single click.

02 Target User Personas & Key Responsibilities

How different teams interact with the web platform

User Role	Primary Web Views Used	Key Operational Tasks in the Web
Compliance Officers	Audited Master, Reports & Analytics, SEBI PDF Export	Monitor firm-wide compliance, review fatal breaches, export audit batches
Surveillance Auditors	Scorecards Ledger, Manual Trade Audit Desk	Validate disputed audits, verify audio recordings, add review remarks
Dealing Desk Heads	Reports (Advisor Risk Matrix), Scorecards Ledger	Identify dealers with recurring Q2/Q3 failures, manage dealer coaching
Equity Dealers/Advisors	Automated Email Scorecards (PDF/HTML)	Receive automated daily scorecard feedback on order confirmation compliance

03 View 1: Audited Master Grid (Live Surveillance)

Central operational grid uniting calls, trades, advisor details, and speech evidence

UI Schematic: Audited Master Grid & Integrated Audio Bar

CALL ID	ADVISOR NAME	CLIENT UCC	SYMBOL & QTY	STATUS	SCORE	AUDIO PLAYER
#2193	Sunil Kumar (W1008)	WIA71438	ITC (100 @ CMP)	PASS	5/5	%¶ Play 27.4s
#2083	Praveen R (W1037)	WIA53357	RELIANCE (50 @ CMP)	PASS	4/5	%¶ Play 26.2s

GLOBAL AUDIO PLAYER: Call #2193 — ITC (100 shares)

Evidence at 27.48s: "quantities. 2nd. 100 quantities WIA71438."

04 View 2: Scorecards Ledger & 5-Axis Radar HUD

Regulatory scorecards with radar chart, fatal filters, and 1-click dispatch

UI Schematic: Radar Analytics & Scorecard Detail Card

5-AXIS RADAR HUD

- Q1 CLI Match: 100%
- Q2 UCC Timing: 85%
- Q3 Details: 71%
- Q4 Consent: 94%
- Q5 Conduct: 100%

SCORECARD #948 — CALL #2193 **SCORE: 5 / 5 (COMPLIANT)**

Dealer: Sunil Kumar (W1008) | Client: WIA71438 | Phone: 9718766002 | Date: 2026-10-06

1. Calling Number Matched Registered Mobile? ..... PASS (1/1) [FATAL]
2. Client Code (UCC) Spoken Before Order? ..... PASS (1/1) [FATAL]
3. Stock, Quantity, and Price/CMP Confirmed? ..... PASS (1/1)
4. Customer Verbal Consent Verified? ..... PASS (1/1)
5. Prohibited Return Guarantee Spoken? ..... PASS (1/1) [FATAL]

05 View 3: Pre-Order Trade Reconciliation Grid

Multi-trade split execution clustering & Missing Call / Mail audit linking

UI Schematic: Multi-Trade Execution Clustering & Order Consolidation

Cluster Engine Feature: Consolidating Split Trade Fills under One Physical Call

Cluster ID	Matched Call	Trades Grouped	Symbols	Total Qty	Weighted Price	Status
CL-104	Call #157 (10:14)	3 Executions	TCS (3 Fills)	150 Shares	¹3,524.40	MATCHED
CL-108	Call #28 (11:02)	2 Executions	INFY (2 Fills)	200 Shares	¹1,842.10	MATCHED
CL-114	Missing Call	1 Execution	HDFCBANK	50 Shares	¹1,680.00	MAIL_CONFIRM

- Multi-Trade Grouping: Prevents dealer from being evaluated 3 separate times for 1 single conversation.
- Missing Call Identification: Trades executed without voice recordings are automatically segregated for email verification.

06 View 4: Telephony Calls Ledger & Audio Inspector

Telephony stream ingestion, scrap call triage, and bilingual transcript browser

UI Schematic: Raw Telephony Ingestion & Transcript Synchronizer

Call Metadata & Timing

- Recording: MUM3-T10-1785834891.73412.mp3
- Duration: 124 seconds (Conversational)
- Calling CLI: 9860538239 (Registered)
- Dealer: W1008 (Ashok Kumar)
- Gate Classification: PRE_ORDER
- Pipeline Stage: AUDITED (Terminal)

SYNCHRONIZED SPEECH TRANSCRIPT

[00:04] ADVISOR: Good morning sir, FundsIndia dealing desk.
[00:08] CLIENT: Haan Ashok ji, 500 shares ITC buy karna hai.
[00:14] ADVISOR: Confirming client code WIA71438 sir, correct?
[00:19] CLIENT: Haan bilkul, market price pe daal do.
[00:24] ADVISOR: Order placed for 500 shares ITC at CMP ¹482.

07 View 5: Executive Reports & Advisor Risk Matrix

Comprehensive Pareto analysis, daily volume trends, and dealer risk stratification

85% Pass
Q2 Client Code Rate
Spoken UCC verified prior to execution

0 Breaches
Q5 Conduct Guarantee
Strict adherence to SEBI return rules

100% Verified
Q1 Registered Calling Line
Authenticated client mobile numbers

Dealer Surveillance & Compliance League Table (Sample)

Advisor Name	Dealer Code	Total Calls	Avg Score	Pass Count	Fatal Breaches	Risk Level
Ashok Kumar	W1008	142 Calls	4.88 / 5	138 Passed	4 Failures	LOW RISK
Praveen R	W1037	98 Calls	4.75 / 5	91 Passed	7 Failures	LOW RISK
Venkatesh S	W1012	84 Calls	4.10 / 5	68 Passed	16 Failures	MEDIUM RISK
Deepak M	W1044	62 Calls	3.65 / 5	41 Passed	21 Failures	HIGH RISK

08 View 6: Manual Trade Audit Desk & Dispute Workflow

Human auditor review desk, remark authorization, and tamper-evident audit trails

UI Schematic: Compliance Officer Audit Override & Review Screen

• Purpose: When a dealer disputes an automated failure (e.g. noisy background where client whispered code), a human compliance officer can listen to the audio, re-verify the dialogue, and record an authorized review remark.
• Tamper-Evident Accountability: Every manual change logs reviewer ID, timestamp, original score, adjusted score, and justification comment.
• Regulatory Audit Trail: Both the automated AI audit score and the reviewed score are preserved for SEBI inspection transparency.

Status: REVIEWED | Reviewed By: Officer #102 | Remark: Client code verified at 27s

09

Daily Operational Workflow: Ingestion to Audit

Step-by-step procedural lifecycle of an equity call inside AuditEQ

Step 1 Telephony & Trade Data Ingestion (09:00 - 15:30 IST)

1. Telephony audio streams are pushed via Tata Tele Smartflo webhooks or bulk uploaded via the web interface.
2. Exchange Trade Book (ODIN/Omnesys/NSE/BSE CSV) is ingested via drag-and-drop on the Trades view.
3. System computes cryptographic SHA-256 hashes of all ingested files to guarantee tamper-proof preservation.

Step 2 Automated AI Processing & Intent Classification (Real-Time)

1. Speech engine transcribes audio, isolates speech channels, and maps conversational turns.
2. System classifies call intent: PRE_ORDER calls advance; SCRAP calls (<6s voicemails/ringing timeouts) are purged.
3. Self-healing watchdog monitors processing queue and auto-recovers any transient network interruptions.

Step 3 Exact Multi-Trade Reconciliation & Clustering

1. Cluster engine groups multiple split fills (e.g. client requested 500 shares filled across 4 transactions) into one call.
2. Calculates consolidated weighted average price and total matched quantity.
3. Identifies missing recordings: trades executed without voice authorization are flagged for Mail Confirmation.

Key Operational Best Practices for Ingestion Teams

• Daily Trade Cut-off: Ingest trade books promptly at market close (15:45 IST) to allow immediate overnight reconciliation.
• File Naming Conventions: Smartflo recordings preserve timestamp strings in filename (e.g. 1785822511.mp3) for sub-second clock synchronization.
• Dealer Directory Maintenance: Ensure all new dealer IDs (e.g. W1050) are mapped to verified advisor names in the Admin settings view.

10

Audit Evaluation, Scorecard Dispatch & Export

Automated scoring, advisor coaching feedback, and regulatory inspection report exports

Step 4

Automated 5-Point SEBI Compliance Audit & Scoring

1. Evaluates Q1 (CLI match), Q2 (Pre-Order UCC), Q3 (Stock/Qty/Price), Q4 (Consent), and Q5 (No Guarantees).
2. Applies fatal scoring rules: 0/5 for fatal breach, 4/5 for minor parameter deduction, 5/5 for clean compliance.
3. Synchronizes scorecards and audits tables atomically with zero mathematical contradictions.

Step 5

Advisor Coaching & 1-Click Scorecard Dispatch

1. Compliance teams click "1-Click Send Scorecards" on the Scorecards view.
2. System generates personalized email batches formatted with official SEBI scorecards and transcript snippets.
3. Dealers receive instant actionable coaching feedback on omissions (e.g. reminding them to verbalize UCC).

Step 6

SEBI Inspection Export & Archival (PDF / Excel / Word)

1. Compliance officers select date range and click "Download SEBI Inspection Report".
2. Generates tamper-evident PDF inspection certificates embedded with SHA-256 verification hashes.
3. Complete audit trail stored in encrypted cold storage archives for the statutory 5-year retention period.

Platform Certification & Operational Sign-off

AuditEQ delivers 100% voice surveillance automation, eliminating manual audit backlog and ensuring total regulatory readiness for SEBI audits. By uniting real-time speech AI with rigorous financial reconciliation, the web platform protects both investors and the brokerage firm.
